

IN THE CLAIMS:

Please amend claim 5 pursuant to 37 C.F.R. 1.312 (see also the accompanying "marked up" version pursuant to 37 C.F.R. 1.121):

5. (Three times amended) A method for inducing an anti-tumor response in a mammalian patient suffering from a tumor, which method comprises administering to said patient a composition comprising a tumor cell or tumor cell extract with an adjuvant, wherein the tumor cell or tumor cell extract is:

- (i) conjugated to a hapten;
 - (ii) of the same tumor type as the patient's tumor;
 - (iii) not allogeneic to said patient; and
 - (iv) incapable of growing in the body of the patient after injection;
- and repeating said administration at weekly intervals,

wherein a therapeutically effective amount of cyclophosphamide is administered only prior to the first administration of the composition, wherein the patient is not sensitized to the hapten prior to administration of the composition, and wherein the composition elicits an anti-tumor response.
